

### Role Description and Eligibility Requirements Template

<b>Role</b>	<b>Lay Member for the RCT Management Panel</b>
Term of office	3 years
No of Meetings	There are 3 meetings per year usually held in February, June and October.
Appointment starts	1 September 2018

#### The RCT Management Panel

The RCT Management Panel is responsible for the management of the Register of Clinical Technologists, which aims to protect the public by regulating the clinical technologist profession. Its full functions are set out in its Terms of Reference. The Panel meets three times each year in York.

Membership of the Management Panel comprises the Registrar and Assistant Registrar, two representatives from each of the three collaborating professional bodies (the Institute of Physics and Engineering in Medicine, the Association of Renal Technologists, and the Institute of Healthcare Engineering and Estate Management), two elected Registrants and two lay members, who are not part of the technologist profession.

These lay members bring their wider perspective on healthcare and public protection.

#### The Role

The Panel is currently seeking a new lay member to attend Panel meetings and contribute to all aspects of its work. These are unremunerated positions, but travel expenses will be paid in line with IPeM's policy.

Topics discussed at meetings typically include education and training for clinical technologists; policies and procedures relating to Registrants' training, admission to the Register, continuing professional development and other professional activities; promotion of the Register in the interests of public protection; and communication with Registrants. A separate Professional Conduct Committee (PCC) handles disciplinary cases and procedures: no member of the Management Panel may sit on the PCC, as the Management Panel is the Panel of appeal for Registrants who have been subject to disciplinary proceedings.

A full induction pack will be provided to the lay member chosen for this role, and they will be allocated an experienced member of the Panel who will act as an advisor and mentor for additional support.

#### The individual

The Panel is looking for people who have an interest in healthcare and the role of healthcare professionals; who are committed to improving the quality of public services; and who are keen to work alongside professionals to develop the technologist profession.

Specific skills required are:

- Proven analytical and decision making skills

### **Role Description and Eligibility Requirements Template**

- The ability to grasp detail and contribute to objective decision-making by exercising sound judgment.
- Good oral and written communication skills.
- Ability to actively listen to others and have regard for their views.
- Ability to make reasoned, unbiased and, on occasion, very challenging decisions affecting other people.
- Demonstrable integrity and respect for others.
- Understanding of the need to handle sensitive and confidential information appropriately.
